

Direct printer connection to SE-6xx devices via USB or Ethernet

**Features:**

- Batch printouts without external computer (control system PC)
- Printout of batch protocols, graphs and event lists
- Automatic printout of the last recorded batch
- Color printer connection over local USB interface or network / LPR protocol with internal or external print server
- Printer protocol supports PCL-XL and/or PCL-6
- Configurable company logo integration, printout date and time, page number and header data fields
- Multiple page print in one print job (e.g. batch protocol two-fold, batch graph three-fold, event protocol single)

*Batch Graph*

*Event List*

A screenshot of an 'Event List' table. The table has columns for 'Time', 'Event', and 'Value'. It contains a list of recorded events with their corresponding timestamps and values. The STANGE logo is visible in the top right corner.

*Batch Protocol*

A screenshot of a 'Batch Protocol' table. The table has columns for 'Time', 'Event', and 'Value'. It provides a detailed list of batch-related events and their parameters. The STANGE logo is visible in the top right corner.
